

SCREW PUMPS MEDIUM PRESSURE TYPE SMxT16B

Dry & submersible screw pumps for industrial applications - Working pressure 40 bar continuous

SMxT16B

40 bar program

SCREW PUMPS MEDIUM PRESSURE TYPE SMxT16B

Dry & submersible screw pumps for industrial applications - Working pressure 40 bar continuous

CHARACTERISTICS

The screw pumps are reliable, low noise and low cost; run without pulsation and guarantee a long life to your application.

USES

The screw pumps coupled together with external or immersed motors run quietly and without pulsation. Are used in hydraulic application and systems of every kind.

OPERATION

The screw pumps are positive displacement rotary pump with axial flow design. There are only three moving parts. The power rotor is the only driven part that extends outside the case. The idler screws actually act as sealing parts and are turned hydraulically by the fluid being pumped. There is only a rolling action between the drive screw and the idler ones. The rolling action eliminates noise and vibration.

TYPICAL APPLICATIONS

- Lube services (diesel engines, turbines, compressors, gears & gear boxes)
- Seal oil services (compressors, generators)
- Power Hydraulics (presses, machine tools, working machines rolling mill, injection moulding machines, dumping equipment, elevators, variable pitch propellers, hydraulic winches)
- Various & special applications for industrial and marine uses
- Food (chocolate, syrups, vegetal oils)
- Hydraulic governors
- Refinery & petrol chemical services
- Cooling
- Transfer services
- Fuel oil burners

SCREW PUMPS MEDIUM PRESSURE TYPE SMxT16B

Dry & submersible screw pumps for industrial applications - Working pressure 40 bar continuous

Detailed technical information

Types	Dry (SMT16B) or submersed (SMIT16B)
Flanges	ISO 3019/2 – IEC standard (for directed coupling with motor)
Connections	SAE 3000
Installation position	free for SMT 16B submerged (totally or partially) for SMIT 16B
Drive loading	No axial or radial loads
Shaft rotation	clockwise viewed at the shaft end
Shaft speed	From 500 to 3.600 rpm
Model available	20 – 32 – 40 – 45 – 55 – 60 – 70 – 80
Flows	From 8 up to 1.200 Lt/min (at 2.750 rpm)
Outlet pressure	40 bar continuous – 50 bar intermittent
Inlet pressure	Min. -0,7 / max. 3 bar
Fluids	mineral oil HLP e HLVP ecologic fluids HETG-HEPG-HEE synthetic fluid or emulsion: HFA oil-water emulsion - oil minimum 5% HFB water-oil emulsion ≥40% HFC water/glycole - water max 35 to 55% HFDR phosphate ester Lubrification high viscosity oils (*) Special synthetic fluid : MIL-H, SKYDROL, special on request
Viscosity	from 4 up to 2.000 mm ² /s
Seals	NBR, VITON, FPM, EPDM - Special on request
Noise	from 52 up to 68 dB(A) at 2.750 rpm Value based on ISO 4412 test procedure
Pump body (standard)	extruded aluminium alloy
Pump body (special application)	cast iron, carbon steel
Screw	steel for primary screw , cast iron for secondary screw
Environment temperature	From -20° up to +60°C
Hydraulic temperature	From -20° up to +180°C
Filtration	permissible degree of fluid contamination NAS to 1638 class 10 or ISO DIS 4406 - 19/16 Recommended filtration β 25 ≥ 75
Maintenance	No

(*) For high viscosity applications and/or oil-air emulsions, please check with us the suitable pump model

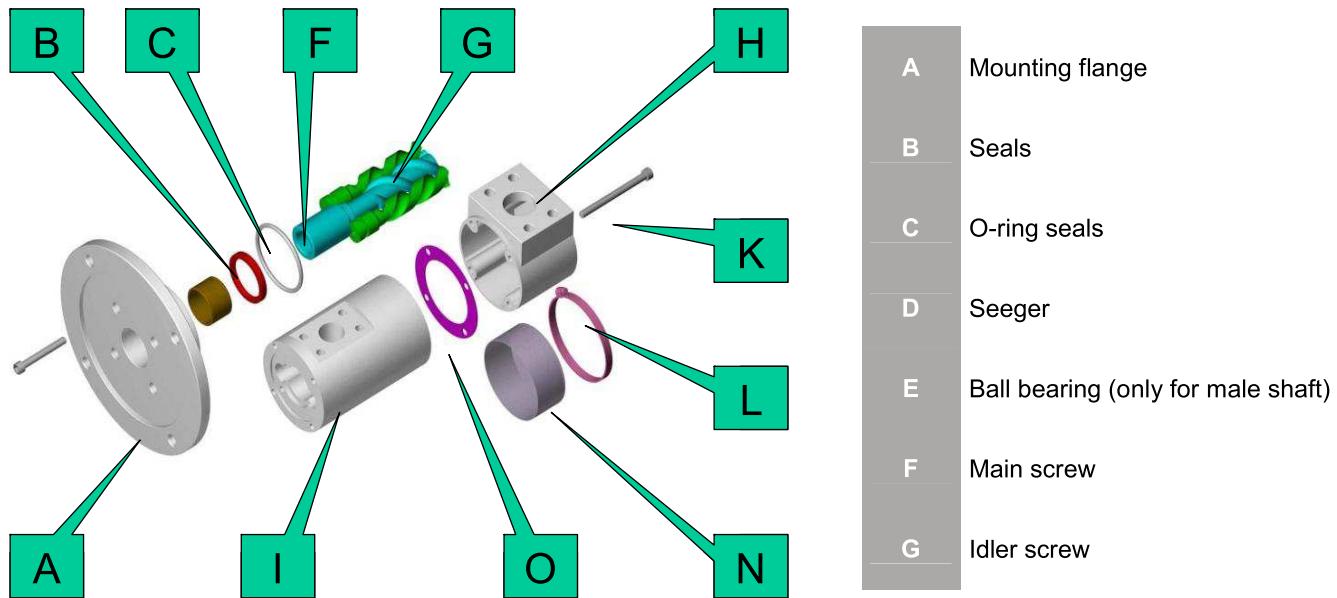

The data shown in the catalogue can change without notice.
For special applications  please contact the main office.

SCREW PUMPS MEDIUM PRESSURE TYPE SMxT16B

(*) For high viscosity applications and/or oil-air emulsions, please check with us the suitable pump model

The data shown in the catalogue can change without notice.
For special applications – please contact the main office.

SCREW PUMPS MEDIUM PRESSURE TYPE SMxT16B

Dry & submersible screw pumps for industrial applications - Working pressure 40 bar continuous

Ordering code

GR80		1.000						
		1.200						

(1) this option reduce the efficiency of the pump

(2) RP valve available only for GR32, GR40 and GR55 models

(3) REV available only for GR32 and GR40 models

Example:

1) GR55 SMT16B 250L S2 AC28/B5 G V RF1

Pump providing a nominal flow of 250L, for thick oil (operation viscosity between 250 and 500 cSt), hollow shaft diameter 28 (motor 132) flange B5, cast iron body, Viton seals, pressure relief valve at 5bar – DO NOT NEED bell-housing and coupling, mountable directly on the motor

2) GR80 SMT16B 1.000L

Pump providing a nominal flow of 1.000 L/min at 2.750 rpm, normal shaft, aluminium body – need bell housing and coupling
